CategorAY Suggestion

At AY.com, we've introduced a smart feature that **automatically suggests a category** when a user creates a thread. By analyzing the content of the thread, the system **predicts** the most **relevant category** to help organize discussions more effectively and improve content discoverability across the platform.

Where to implement:

- When **creating** a new **thread** at **Create New Thread Modal** and **Home Page**.

Dataset:

- https://www.kaggle.com/datasets/amananandrai/ag-news-classification-dataset
